

	Residential		Local Roads
SURVEY RESPONSE #	Property Owner?	Q2	Comments
1	Y	5	(The Point Road East) Town roads should be plowed (soon) right after a snow event to prevent the surface from being packed with snow due to traffic thus creating ruts in the wheel tracks making travel difficult. Having worked for a county highway department I know how important this is. Need to keep roads in good condition in case of emergency situations and being able to get elderly citizens for medical appointments.
2	N	8	Well maintained and repaired
9	Y	7	Some bad spots
16	Y	1	Very little maintenance done on most roads.
18	Y	7	Some roads need attention.
26	Y	4	Roads need extensive repair/patching done correctly not cold patch unless in winter.
28	N	5	Need to plow better in the winter. Always ice covered on Lee Road and North, Center, South.
38	Y	4	The road I live on was changed over the years from what remains in the plat books. Makes hard to determinelawful set back - say to build a garage.
49	Y	3	Lack of maintenance cause the high traveled roads to deteriorate which leads to replacements.
53	Y	1	Espec Lee Road
58	Y	5	Fill cracks in roads and scrape snow off roads better - sand & salt more often.
60	Y	5	The budget allocation for road construction and maintenance needs to be increased.
61	N	3	Some of the more traveled roads lack maintenance.
62	Y	8	What does this have to do with land use?
68	Y	1	Especially Lake Nokomis Road, patching is not doing anything.
69		5	Some are pretty bad
72	Y	2	Robinson Road potholes - lack of sanding and plowing during winter.
73	Y	2	A lot of work needs to be done.
78	Y	4	Needs better maintenance and more aggressive plan to repave worst roads
83	N	4	Lack of sand or salt, better plowing
87	Y	6	Repairs on Hwy L are sub-par.
90		5	We would like to see road issues addressed in a timely manner. (Like potholes and road shoulders)
93	N	5	I live off of a road that used to be gravel and was crowned yearly. Now the road receives very little maintenance. In spring and during rain it is basically mud with vehicles sinking in a deeply rutted.
94	Y	3	It seems there is no long-term yearly plan for road upkeep/maintenance
95	Y	7	Generally good, but some need work
98	N	3	More grading, really like the upgrade which was done on Lylas Road
99	N	8	Lake Nokomis Road is bumpy. Mostly on NW end
100	Y	3	Just cause we live on a dead end - we pay taxes. Plowing/sanding is always a day or two after the roads in the area are taken care of. We need to get out like everyone else. It would take a minute for the plow to swing down the road to plow or sand.

102	N	1	The town took my road into my lot. I owend the lot over 55 years. The road was there when I bought it now you raise the road and there is a ditch so I can't get on the lot .
105	Y	1	Terrible, but new town road foreman is doing excellent job.
107	Y	3	Need holes fixed. Need sand put down on icy roads more often.
114	N	7	They're good
115	N	7	Point Road on Lake Nokomis does not seem to get plowed enough.
116	N	10	Roads are well maintained
125	Y	9	Please advise county that they need to resurface L if they do not already have it planned.
128	Y	3	Many town roads not good for biking.
129	Y	5	Very expensive to maintain - fairly good for cars but not for bikes
135	N	7	Reasonably good
139	Y	7	Sand truck sometimes has too much large rocks, like gravel in it.
143	Y	8	Buckhorn Rd is nice
152	Y	4	Lived here 25 years, road improvement have not been done in this time, when they are they are not engineered properly, IE, whatever is easy.
153	Y	4	The roads need work, not just patching, replacing is ideal. A time line for replacing each road to be posted.
159	N	6	Survey and repair on the basis of traffic and road condition.
162	Y	3	They don't plow gentle Ben Road half the time.
164	Y	8	Our dead end seems to be cleared at the very end of plowing. Not sure why it can't be with other roadway.
165	Y	8	Most of the main roads in good shape. Some second roads need repairs
169	Y	6	You can tell the line of Oneida County / Lincoln County during snowy conditions. Roads are not ever as clear out this way
170	N	8	Since ATV/side by side on roadways rocks on all corners unsafe for motorcycles and thrown at windshields - slow down ATV and side by side on corners
171	N		unknown
172	N	8	Roads overall are well maintained
179	Y	4	Only patching small sections - have noticed plows out early than previous years, yah!
183	N	6	Tomanok Road could be resurfaced.
190	Y	4	not filling potholes
195	Y	4	Many roads are pot-holed without any attention for months/years
197	N	2	Some roads are OK, but especially the end of Prairie Rapids Road and Old 8 by Boomba were in terrible shape. I see now some, what look like temp. fixes have been made.
200	N	8	Lake Nokomis Rd needs resurfacing it has lots of daily traffic
204	Y	7	There are areas that need the trees trim back that overhang. Also there are some puddling areas
209	Y	8	Will need work in the future if business and recreation finally come in (people need to understand <u>good</u> and <u>bad</u> descriptions)
215	Y	5	More work on Prairie Lake Road, dirt to Swamp Lk.
216	Y	5	Pot holes could be filled before winter.
221	N	6	Some are worse than others

226	Y	9	Roads seem great. Spots here and there but overall pretty good. Job well done
227	Y	2	Patching is fine - but learn to do all of the potholes in an area - not one or two.
228	Y	4	Fix potholes, plow right away don't wait for snow to get packed down and come ice , don't be afraid to put some salt/sand down
229	N	2	Roads need fixing/patching, repaving
231	Y	5	Some roads good but others could use some work.
238	Y	5	some could need resurfacing
246	N	8	When would Lund Road be paved?
256	Y	1	Almost every road in township are very bad.
265	N	7	Always room for improvement - but not out of line from other town(s) roads.
269	Y	7	* Mix sand with 30% - 50% salt on local roads. * County L agreement with Oneida County to clear roads in winter... poor job.
271	Y	3	Need improvement
275	Y	5	Need culverts to prevent water runoff and erosion of land. Point Road
276	Y	2	Highway L always icy!
280	N	6	You are repairing or replacing the best you can
290	N	8	Happy with roads
301	Y	8	Seems like they do the best they can with limited resources.
